

Complete Solutions for Liquid Filtration

# Self Cleaning Filter

## High Pressure Range

Models 200HP, 300HP, 400HP, 600HP,  
800HP, 1000HP, 1200HP

Sizes 40mm (1 1/2") - 300mm (12")

### Manual & Automatic

The High Pressure range of self cleaning filters have been successfully applied in many difficult liquid handling installations throughout the world.

### Main Features

- Continuous Filtration - No interruption to flow during cleaning process
- Minimal amount of liquid loss during cleaning process
- Suitable for practically all liquids including those of high viscosity
- Filtration levels down to 25 micron
- Integral cast construction
- Maximum working pressure 35 bar at 50°C
- Maximum working temperature 260°C (dependent on seal material)
- Available in cast iron, SG iron, cast steel, stainless steel or gun metal
- High quality 316 stainless steel wound wedge wire or perforated element

### Options

- Range of automated control devices available
- Heating jackets

Please note

- 1 Working pressure is stated at 50°C. To verify suitability of this equipment above this temperature or below 0°C, please contact our Technical Sales Team.
- 2 Whilst alternative seal materials e.g. EP, PTFE are available and can be used to offer a wide range of chemical compatibility and working temperatures up to 260°C, it is recommended that such applications are again discussed with our Technical Sales Team.
